

Vortex Plus

Introduction

Vortex Plus is a low profile CPU cooler with compact size but uncompromising cooling efficiency. The compact feature best suits in HTPC chassis or chassis with slim width and limited space. The heatsink comes with 4 heatpipes and direct contact base to maximize the heat conductivity and dissipation efficiency. The balanced PWM fan works to provide high airflow under high RPM mode and quietly under low speed based on the user's preference.

Features

- Compact profile design for HTPC chassis and LAN box chassis.
- Universal mounting for Intel LGA1366/1156/775 and AMD AM3/AM2/940/939/754 sockets.
- 4 x Direct Contact heatpipes for seamless contact between CPU surface and cooler.
- Extra silent PWM fan with wide speed range and unique blade design for excellent airflow.
